305 Stainless Steel Finish Screw

Tiny Finishwork Head
The tiny finishwork head has been specifically engineered to be almost invisible when mounted, without compromising strength of the head or screw. The head size fits with concealed mounting tools.

Reverse Threads
The reverse threads help to pull down debris and works perfectly together with the small head size to create clean finish. The reversed threads even make it possible for the screw to be collated.

Fast Start Tip
With the sharp threads all the way to the tip, the fastener has an immediate grip for a fast start. The inset thread cut drastically reduces splitting effect and minimizes the driving torque needed to engage the wood.

Works with concealed mounting tools.

Available in 1lb, 5lb and Bulk

305

The advanced Finish Head Wood Screw for saltwater or typical corrosive environments. Use them on any size job or project. Great for any size job or project.
The PICO screw is a slim fastener, yet engineered for good holding power. Our extra sharp, Fast Start Tip grips quickly into the wood and saves you time on site. The wide threads provide a strong connection while the reverse threads help pull down fibers. The tiny head stays out of sight for a clean, professional finish. Fits with most concealed mounting tools.
